

Toitū Envirocare is New Zealand's premier carbon verification and certification service provider, dedicated to assisting organisations on their transformative journey toward a zero-carbon future. Our vision is to see all organisations become net positive contributors to the environment.

Toitū offers two distinct levels of GHG verification, aligning with the criteria for a carbon emissions review specified in the Uplift document. Whether you require a comprehensive assurance-based verification to ISO 14064-3 or a verification based on 'agreed-upon procedures' to meet the minimum requirements as outlined in the Uplift criteria, Toitū has the expertise and experience to meet your specific needs.

Our verifications can help substantiate climate performance with a high level of certainty, but they also ensure alignment with the applicable legal, regulatory, and reputational frameworks. We adhere to international best practices and standards, including ISO 14064-1, and follow the GHG Protocol guidelines.

Toitū recognises the need for collective climate leadership. We are here to support production companies in meeting expectations and criteria in demonstrating a commitment to sustainability and success.

For further information and guidance tailored to your unique requirements, please don't hesitate to reach out to our local representative and expert, Cayley Alger. Together, we can navigate the path towards a brighter future where sustainability and success are intertwined.
